

# About DPR Construction

**DPR CONSTRUCTION** is a unique technical builder with a passion for results. First appearing in the top 25 general contractors in the country in 1999, we are a national commercial contractor and construction manager that has grown with our customers by delivering measurably more value and expertise. Whether it is a multi-million-dollar technical facility or a conference room renovation, we execute every project with relentless accountability. Founded in 1990 by Doug Woods, Peter Nosler and Ron Davidowski (the D, P and R), the privately held, employee-owned company has grown to more than 5,200 employees with projects and offices across the nation, and, in 2016, posted a revenue of \$4 billion, making DPR a great story of entrepreneurial success.

## CULTURE - BUILDING GREAT THINGS

At DPR, we cultivate a strong entrepreneurial environment based on a well-defined purpose, “We Exist to Build Great Things,” and four core values, “integrity, enjoyment, uniqueness, ever forward.” We are a flat, titleless organization that empowers people at all levels to make decisions. By focusing on “what is right” rather than “who is right,” we have created a culture of discipline that supports our take-charge, self-initiated, roll-up-our-sleeves attitude and management style that meets the needs of today’s technically demanding, time-challenging projects. We believe work should be fun and intrinsically satisfying; if we are not enjoying ourselves, we are doing something wrong. DPR exists to build great things—great projects, great teams, great people.

**SAFETY - THE DRIVE TO ZERO**

DPR is fortunate to work with some of the best companies in the world, and like them, we are committed to setting new standards. Since we were founded in 1990, we have focused our culture of safety on the education and training of the entire project team, inspiring thousands of workers to support the belief that **zero accidents** is truly an **achievable goal**.

1.07

DPR has a recordable incident rate of 1.07, which, compared to the national average of 3.6, makes DPR one of the safest contractors.

4

DPR now has four net-zero designed offices, all producing more energy than they use, including Phoenix, San Diego, San Francisco and Washington, D.C.

**THE PATH TO NET-ZERO ENERGY**

With the goal of **being environmentally responsible in the way we do business**, DPR has pioneered net-zero energy building through living laboratories in our San Francisco, Phoenix, San Diego and Washington, D.C., offices. Deeper green than traditional sustainable construction, these offices are prime examples of the future of sustainability. DPR’s four living labs offer the opportunity for DPR to study and experiment with what makes the buildings most efficient over time. Read more at <https://www.dpr.com/view/path-to-net-zero-energy>.

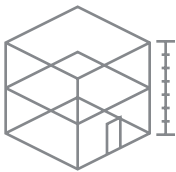

**INTEGRAL AND INDISPENSABLE TO OUR COMMUNITIES**

DPR is deeply committed to meeting its responsibility as a corporate citizen by leveraging our unique skills and resources to make the greatest impact on the needs of our communities. We implement this vision by **supporting under-resourced communities** through financial donations and skills-based volunteering focused on our areas of expertise.

27,000

DPR volunteered 27,000 hours in 2016, focused on our areas of expertise: Facility Construction and Renovation, Career/Education Guidance for Youth and Operational Support for Non-Profit Partners.

**COLLABORATIVE VIRTUAL BUILDING**

Providing measurably more value is DPR’s guiding principle in using technology to enhance project delivery. As a **long-established leader in virtual design and construction and building information modeling**, we know that technology alone cannot deliver the level of results we have all come to expect. Team members are key in skillfully using and improving the application of the most relevant technologies to help achieve better value and savings, while creating practical and innovative solutions.

1997

DPR first started using BIM in 1997 and continues to use the technology for greater project efficiency.

**TRAINING - “BULLET-SMART” BUILDERS**

**Who we build is as important as what we build.**

We offer a variety of classes on such topics as green construction, safety, electrical and mechanical systems and self-perform work, as well as general business courses, including communication skills, presentation skills, time management and negotiating skills. The **Training Top 125** is the only report that ranks companies unsurpassed in harnessing human capital; Training Magazine named DPR No. 26 on the list in 2017.

176

DPR employees were offered 176 in-person training courses in 2015, with another 30 virtual trainings and 280 online, self-paced e-learning courses.

96%

Based on employee surveys, DPR employees have a 96% satisfaction rate.

**A GREAT PLACE TO WORK**

Over the years, DPR’s various regional offices have consistently been recognized as great places to work within their communities, so it came as no surprise when Fortune magazine included DPR on its prestigious “**100 Best Companies to Work for**” list for 5 consecutive years. DPR was specifically recognized for work/life balance, low turnover, annual pay, employee referral bonuses and fully paid sabbaticals. With benefits like relocation assistance and up to \$5,000 of education reimbursement, DPR truly is a great place to work.
