IT STARTS WITH YOU

Internships and Entry-Level Job Opportunities Available Nationwide

We hire problem solvers, entrepreneurs, and those that are team-focused. We value passion, hard work, and a serious commitment to delivering maximum value to our clients, our shareholders, and the communities in which we live and work. Formal education and training is important but we are also looking for those with a genuine passion for the construction industry, demonstrated hands-on experience through internship/co-ops, and actual work experience. If what we build excites you as much as it does us - we would like to hear from you!

Construction Engineer

- Prepare and analyze job costs
- Develop project schedules
- Maintain engineering files and records
- Assist in the preparation of job generated drawings
- Assimilate data for change orders and claims

Quality Control Engineer

- Assist with implementation and maintenance of Quality Management systems including; QC Plan, laboratory accreditation, QC/QA project management

Plant Engineer

- Coordinate production schedules
- Assist in evaluating production through cost accounting and quality control
- Coordinate maintenance procedures
- Monitor environmental compliance

Environmental Engineer

- Coordinate environmental programs using established guidelines, including all aspects of the permitting and compliance processes
- Provide engineering solutions to meet environmental needs

Safety Engineer

- Build relationships with our employees to better understand risk and resource needs
- Communicate the corresponding regulations which relate to the safety of our work
- Assist with the coordination and administration of our Safety and Health Management System

Take-off Technician

- Analyze plans and specifications
- Perform computer aided preparation of quantity take-offs
- Verify site conditions, review construction methods, and equipment utilization
- Assist in preparing bid documents and developing construction schedules
