A SOUTHERN CALIFORNIA GENERAL CONTRACTOR THAT VALUES GREAT PROJECTS AND OUR PEOPLE WHO BUILD THEM

Snyder Langston Commercial: Snyder Langston is a master builder that provides a client centric approach to the building process. Since 1959, we have been honored to partner with the finest architects, developers and users to build a diverse selection of projects across Southern California.

Snyder Langston Residential: Snyder Langston recognized Southern California's long-term need for high-density residential space that would respond to the market demands of a growing urban population.

Snyder Langston Optym: Optym bridges the gap between Snyder Langston Commercial's large-scale expertise and the quick, nimble approach needed to deliver fast-track projects with the same level of Snyder Langston quality.

Our BRIDGE program is designed to support employees' passions to give back to their communities, including charitable, faith-based programs and youth sports activities. Our employees determine which organizations Snyder Langston supports through volunteer efforts and monetary donations generated through individuals' time spent in the community.

Obtaining and maintaining a base knowledge of our collective skills among employees can be both exciting and challenging. To enable employees to become assimilated into the organization and underscore our commitment to continuous learning and sharing knowledge, we have established Snyder Langston University (SLU).
